

RightMed® Medication List

The RightMed® Comprehensive Test is a prescription pharmacogenomic (PGx) test that analyzes an individual's DNA to help providers determine how he or she may respond to certain medications. It is also another tool for individuals to use in their own complete medical history.

The following table lists medications that will be classified in the RightMed® Comprehensive Test Report according to an individual patient's genotype and the medication interaction determined by the PGx test.

This table does not include medications with limited impact on medication response and genetics.

Allergy/Pulmonology	Dextromethorphan (Delsym®)
Analgesic/Anesthesiology	Alfentanil (Alfenta®) Buprenorphine (Buprenex®, BuTrans®, Subutex®) Carisoprodol (Soma®) Codeine Fentanyl (Duragesic®, Sublimaze®) Hydrocodone (Vicodin®, Lortab®, Norco®, and more) Ketamine (Ketalar®) Methadone (Dolophin®, Methadose®) Morphine (Kadian®, MS Contin®, Avinza®, Roxanol®, Oramorph®) Oxycodone (OxyContin®, Roxicodone®, Percocet®, Percodan®, and more) Tramadol (Ultram®)
Anti-Inflammatory	Celecoxib (Celebrex®) Diclofenac (Voltaren®) Flurbiprofen (Ansaid®)
Anticoagulant/ Antiplatelet	Apixaban (Eliquis®) Cilostazol (Pletal®) Clopidogrel (Plavix®) Ticagrelor (Brilinta®) Warfarin (Coumadin®, Jantoven®)

Cardiovascular	Amiodarone (Cordarone®, Pacerone®) Atorvastatin (Lipitor®) Carvedilol (Coreg®) Disopyramide (Norpace®) Dofetilide (Tikosyn®) Flecainide (Tambocor®) Metoprolol (Lopressor®, Toprol XL®) Pravastatin (Pravachol®) Propafenone (Rythmol®) Quinidine (Quinaglute Duratab®, Quinidex Extentabs®, Cardioquin®, Quin-G®) Simvastatin (Zocor®)
Endocrinology	Ethinyl estradiol (Estinly®, In combination with other meds for Birth control)
Gastroenterology	Aprepitant (Cintanti®, Emend®) Dexlansoprazole (Dexilant®) Dronabinol (Marinol®, Syndros®) Esomeprazole (Nexium®) Fosaprepitant (Emend® Injection) Lansoprazole (Prevacid®) Omeprazole (Prilosec®) Ondansetron (Zofran®) Pantoprazole (Protonix®) Rabeprazole (Aciphex®)
Genetic Disease	Eliglustat (Cerdelga®)
Hematology/Oncology	Belinostat (Beleodaq®) Brentuximab vedotin (Adcetris®) Capecitabine (Xeloda®) Dasatinib (Sprycel®) Docetaxel (Docefrez®, Taxotere®) Fluorouracil (Adrucil®) Gefitinib (Iressa®) Trinotecan (Camptosar®) Lapatinib (Tykerb®) Methotrexate (Rheumatrex®) Nilotinib (Tasigna®) Pazopanib (Votrient®) Ruxolitinib (Jakafi®) Tamoxifen (Soltamox®, Nolvadex®) Temsirolimus (Torisel®)

Immunosuppression	Cyclosporin (Gengraf®, Neoral®, Sandimmune®) Sirolimus (Rapamune®) Tacrolimus (Prograf®)
Infectious Disease	Abacavir (Ziagen®) Atazanavir (Reyataz®) Atovaquone/Proguanil (Malarone®) Isavuconazole (Cresemba®) Itraconazole (Sporanox®, Onmel®) Peginterferon alpha-2b-containing regimens (PegIntron®) Voriconazole (Vfend®)
Neurology	Carbamazepine (Tegretol®, Carbatrol®) Clobazam (Onfi®) Eletriptan (Relpax®) Eslicarbazepine (Aptiom®) Fosphenytoin (Cerebyx®) Lamotrigine (Lamictal®) Oxcarbazepine (Trileptal®) Phenytoin (Dilantin®) Selegiline (Eldepryl®) Tetrabenazine (Xenazine®)
Psychiatry	Amitriptyline (Elavil®) Amphetamine/Dextroamphetamine mixed salts (Adderall®) Asenapine (Saphris®) Bupropion (Wellbutrin®, Zyban®) Cariprazine (Vraylar®) Chlorpromazine (Thorazine®) Citalopram (Celexa®) Clomipramine (Anafranil®) Clozapine (Clozaril®) Desipramine (Norpramin®) Dextroamphetamine (Dexedrine®) Diazepam (Valium®) Doxepin (Sinequan®) Escitalopram (Lexapro®) Fluoxetine (Prozac®, Sarafem®) Fluvoxamine (Luvox®) Guanfacine (Intuniv®, Tenex®) Haloperidol (Haldol®) Imipramine (Tofranil®) Levomilnacipran (Fetzima®) Lisdexamfetamine (Vyvanse®) Lurasidone (Latuda®) Nefazodone (Serzone®)

Psychiatry (cont.)	Nicotine (Nicorette®, Nicoderm C-Q®, Nicotrol®) Nortriptyline (Pamelor®) Olanzapine (Zyprexa®, Zydys®) Paroxetine (Paxil®) Perphenazine (Etrafon®) Quetiapine (Seroquel®) Selegiline (Emsam®, Eldepryl®) Sertraline (Zoloft®) Thioridazine (Mellaril®) Trazodone (Desyrel®) Trimipramine (Surmontil®) Vilazodone (Viibryd®) Vortioxetine (Trintellix®)
Rheumatology	Allopurinol (Aloprim®, Zyloprim®) Cevimeline (Evoxac®) Lesinurad (Zurampic®) Methotrexate (Rheumatrex®) Tofacitinib (Xeljanz®)
Urology	Fesoterodine (Toviaz®) Tamsulosin (Flomax®)

The RightMed® Test's medication reporting may vary based on local regulations.

The PGx test results provided for these medications are not intended to be the only information used in medication decisions for a patient; the results do not include other factors that the prescriber should consider. The test does not specify whether or not the individual should or should not take these medications. The healthcare provider remains ultimately responsible for all diagnosis and treatment decisions.

Commonly used trade names for medications are listed for reference only. The list may not be inclusive of all trade names available and does not indicate preference or recommendation by Empowering Health Options of one medication over another.

List Current as of April 15, 2021 – Subject to Change
